

EDUCATION

Nirma University

Bachelor of Engineering in Computer Science and Engineering

Aug 2023 – Jul 2027

CGPA: 8.78/10

TECHNICAL SKILLS

- **Languages:** C, C++, Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
- **Core CS:** Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks, Distributed Systems
- **Frameworks:** React.js, Node.js, Express.js, Django, FastAPI, Next.js, Socket.io, REST APIs
- **ML/Data:** Machine Learning, Deep Learning, NLP, Computer Vision, Data Analysis, Data Science, Data Visualization, Statistical Data Analysis, Big Data Analytics, LLM
- **Cloud:** AWS (Lambda, S3, DynamoDB, IoT, MQTT, SES, SNS, QuickSight), GCP, Cloud Computing, Docker
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Supabase, DBMS
- **Tools:** Git, GitHub Actions (CI/CD), Power BI, Tableau, VS Code, Postman, MLflow, Linux
- **Other:** Leadership, Teamwork, Problem-Solving, Project Management

PROFESSIONAL EXPERIENCE

Data Engineer Intern | Adani Group

Jun 2026 – Jul 2026

- Built ETL workflows and complex SQL queries to extract, transform, and validate large-scale operational datasets for business reporting.
- Automated recurring reporting with Python scripts and interactive Power BI dashboards, improving processing efficiency.
- Collaborated with cross-functional teams to optimize SQL queries and improve internal reporting systems and data applications.

Software Development Engineer Intern | Disha Enterprise

May 2024 – Jul 2024

- Designed scalable backend services and RESTful APIs in Node.js/Express.js; optimized MySQL indexing, cutting query response time by 30%.
- Implemented request validation and secure coding practices; collaborated via Git-based code reviews in an agile team.
- Built robust error handling across services, improving system reliability under production traffic.

Full-Stack Development Intern | Codveda Technologies

May 2025 – Jun 2025

- Built and integrated RESTful APIs across frontend and backend; optimized database operations to improve reliability and performance.
- Collaborated using Git-based workflows while debugging, testing, and enhancing application functionality.
- Built scalable, maintainable software components following software engineering best practices.

Full Stack Developer Intern | Nexus Software

Dec 2023 – Mar 2024

- Built full-stack applications (React, Node.js, Express.js, MongoDB) with JWT authentication and Role-Based Access Control.
- Diagnosed and resolved 30+ production issues, improving application stability through Git-based collaboration.
- Designed scalable architecture following software engineering best practices for maintainable, production-ready code.

PROJECTS

CoreInventory – Inventory Management System

- Built a production-ready inventory system (Node.js, Express.js, PostgreSQL) with a normalized schema for warehouse/stock tracking.
- Designed 15+ RESTful APIs with robust validation; optimized SQL indexing and configured CI/CD pipelines via GitHub Actions.
- Configured automated testing and GitHub Actions CI/CD pipelines to ensure reliable, repeatable deployments.

ShieldGate – Secure Document Sanitization Platform

- Developed a multi-format (PDF, DOCX, CSV, JSON, image) document platform with automated PII detection and redaction using Regex, SpaCy NLP, and OCR.
- Implemented RBAC, secure storage, audit logging, and session management using Supabase.
- Integrated the VirusTotal API to validate uploaded files, improving document security and processing efficiency.

Customer Intelligence Platform

- Built a feedback intelligence platform (Next.js, TypeScript, Supabase) with semantic search and clustering via pgvector and Llama 3.
- Implemented prioritization workflows and interactive dashboards with Redis caching and Row-Level Security.
- Centralized feedback from surveys, reviews, support tickets, and CSV uploads to surface customer sentiment and emerging product themes.

Gaming Multiverse Platform

- Developed a full-stack gaming platform (React, Tailwind, Supabase) with authentication, quest tracking, and persistent progression.
- Built a real-time voice assistant using FastAPI, WebSockets, and a Retrieval-Augmented Generation (RAG) pipeline.
- Designed responsive interfaces with GSAP animations and reusable React components to deliver an engaging user experience.

ACHIEVEMENTS & CERTIFICATIONS

- Ranked among the Top 1500 participants nationwide in the Google Big Code Challenge.
- Selected among the Top Teams at Nirma University in the NASA Space Apps Challenge 2024.
- AWS Certified Cloud Practitioner — ML Specialization (Coursera) — Deep Learning Specialization (Coursera)
